With the issue of the 1928 edition of Catalog 18 no essential changes have been made. However we have added many new items recently linked to our stock. These designs have been made to fill the demand for the new requirements that have arisen with the evergrowing popularity of Wrought Iron.

Little need be said about the usefulness of our Ornaments, since their great scope and variety is sufficiently known and the designer has well familiarized himself with their adaptability to all manner of work.

Being made of a high grade of Iron they can be reworked and finished in any desired manner. It is of note that they approach to a masterly degree the handforged character being designed by artists and made with utmost care by skilled craftsmen.

The majority of patterns listed in this catalog are carried in stock in Chicago, New York and San Francisco Warehouses. Others not carried as well as special designs can be furnished in short order from factory.
